

message bar ~40 characters

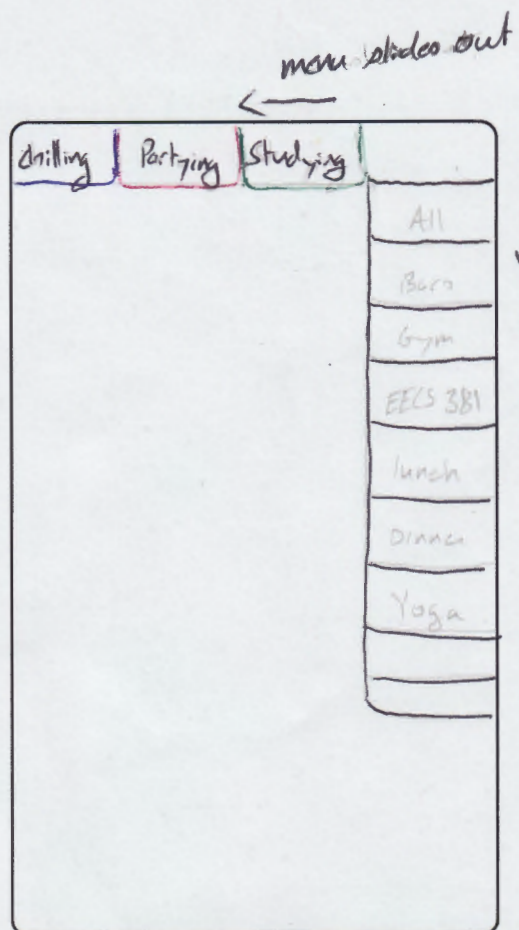

- The semi-circular fan interface will be replaced by a bar interface for now.
→ see next page.

The Ping button indicates the # of people in the group to be pinged.

- > Friends or groups can be selected for unique pings.
 - upon selection name/group becomes bold + a different color.
 - Tapping ping button confirms choice
- > Clear button clears previous choices.

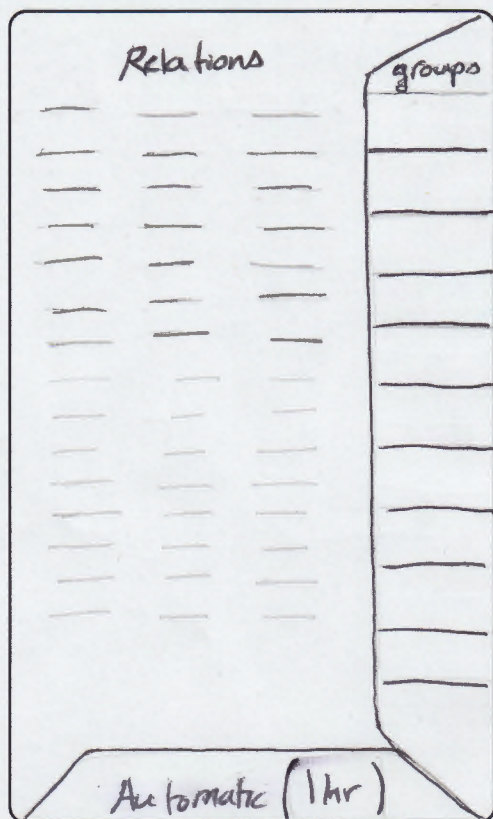

- this is meant to replace the fan interface. to keep things simple in the beginning.

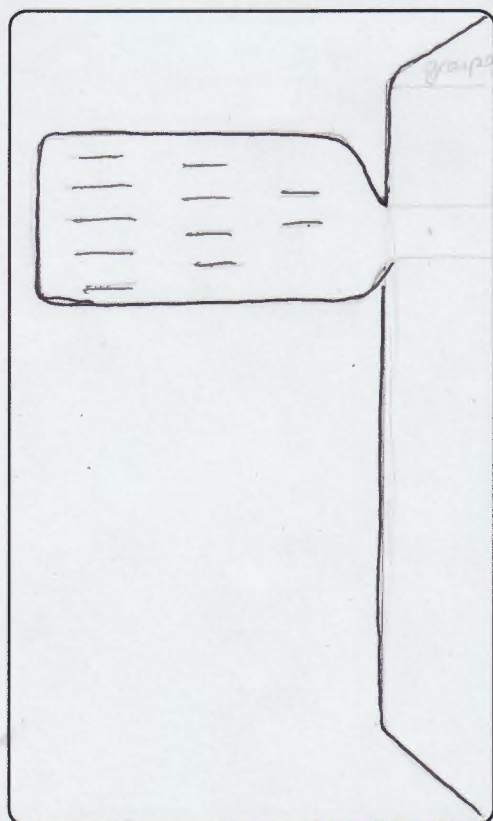

- Top slide out bar is to toggle between the different colors that your pings can appear as.

- tapping outside of the interface causes it to collapse back in.

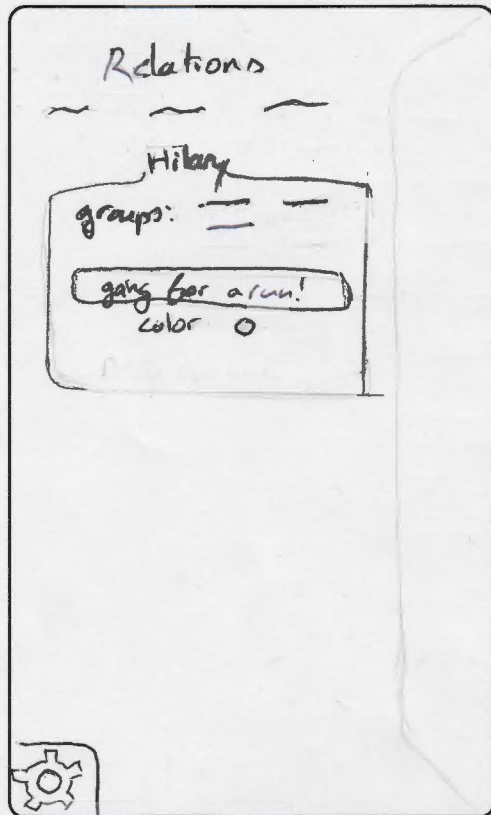

> groups can be color coordinated by individual users

- hold and drag names to add to groups

- by tapping a group it expands to show all the individuals in the group. individuals can be held and dragged out of groups
